# California QSO Party

**CQP 2020:** 

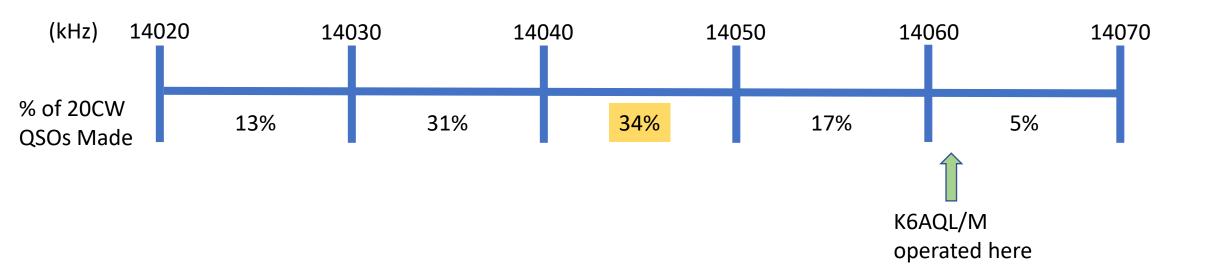

Where can I find CQP activity on 20M and 40M?

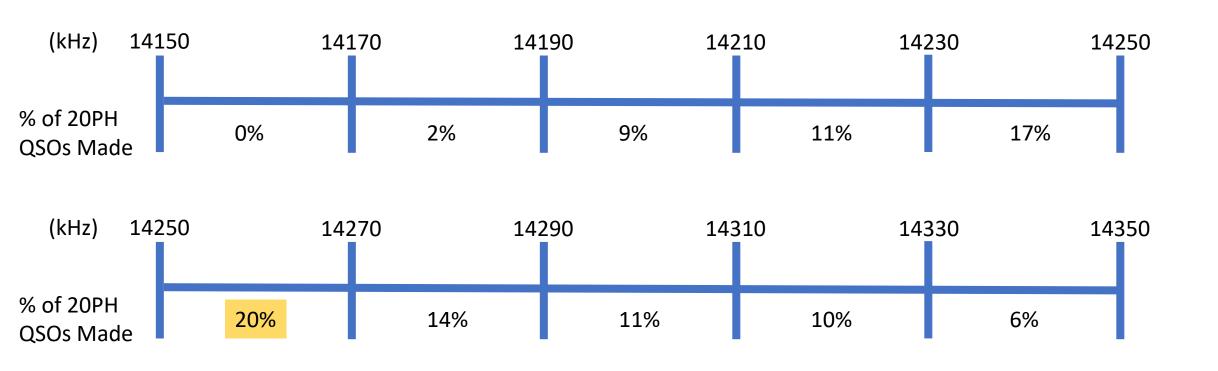

# CQP 2020: 20M and 40M Frequencies

- Based on all logs received in CQP 2020, we analyzed the frequency of each QSO made on the most active bands: 20M and 40M.
- Omitted from this analysis were logs that contained only generic information about the frequency of each QSO. (for example, 14000 CW for all 20m CW QSOs) We also found logs that listed all their band/mode QSOs on one frequency (for example, 14025 CW for all 20m CW QSOs). Those were also omitted in an attempt to make the plots on the next pages as accurate as possible.
