

California QSO Party: 2019 & 2018 County Rareness Data

- Based on CQP logs received from outside of CA.
- There were impressive efforts by CA stations in all 58 counties which allowed these sweeps to occur. County multiplier totals increased substantially in 2019 compared with 2018. Many thanks to everyone in CQP 2019.
- This list is intended to provide a data based guide for California participants to evaluate which counties they should consider activating for CQP 2020. Please note that some 2019 CQP expeditions will not repeat in 2020. For example, we already know that the most active stations in MARP, TUOL, MADE and SISK from 2019 will not operate from those counties in 2020. We need your help in such cases this year, as well as in the top missed 2019 counties.
- The difference between a well covered county and a rare county is often just one serious station. Please consider being that station in a county!
- Please see table starting on next page.

CA County	2019 Rareness Rank	2018 Rareness Rank	# of 2019 non-CA stations that submitted a log and contacted this county	# of 2018 non-CA stations that submitted a log and contacted this county
