

Mono W6ML

Mono W6ML

- I previously operated CQP County Expeditions in Mammoth Lakes, Mono County for 22 consecutive years, 1992 through 2013. Beginning in 2014, I operated the next 4 years from my home QTH in Santa Monica (Los Angeles County).
- In 2018, I returned to Mammoth Lakes for another Mono county expedition. Since my wife and I both had just retired. we had time to plan an extended High Sierra vacation and fit CQP in the mix too.
- My antennas consisted of dipoles on 80, 20 & 15M plus a 40M Inverted V all launched to heights of about 60ft in the surrounding pine trees.
- All my antennas and equipment worked as expected. After a first blazing hour of 106 QSOs on 20M CW, I averaged about 52 QSOs/hour for the balance of my time.
- And thanks to Hank, W6SX for helping us share the bands with minor interference between our HP stations about 1/2 mile apart in Mammoth Lakes.
- 73, Jim W6ML (W6KC)
- Station: K3S, AL80B Amp, 80M, 20M & 15M Dipoles & 40M Inverted V all at 60Ft plus 8,000ft Above Sea Level
- 2018 CQP Results:
- 1st Place, Single Op, County Expedition
- Mono County CW PH Total Mult Score Type
- W6ML (W6KC op) 890 281 1,171 58 187,456 SOA E
