## CQP 2020

### COMEBACK AWARD

#### Eligibility:

- Submitted a log as S/O or S/O-Assisted entry in CQP 2018.
- Did not submit a log in CQP 2019. Was not an operator in a Multi-op entry in CQP 2019.
- Submitted a log a S/O or S/O-Assisted entry in CQP 2020.

Comeback award is based on final score in CQP 2020, regardless of power level. S/O and S/O-Assisted entries are combined into one list, separated by QTH.

Congratulations to the Top 10 finishers for CA and for US/VE/DX, shown on the next page!

Plaque winners shown in green.

## CQP 2020

### OPERATING TIME IMPROVEMENT AWARD

#### Eligibility:

- Submitted a log as S/O or S/O-Assisted entry in CQP 2019.
- Submitted a log as S/O or S/O-Assisted entry in CQP 2020.

We calculated the operating time of every S/O and S/O-Assisted participant in CQP 2019 and CQP 2020.

This award is based on the improvement of operating time in CQP 2020, compared with the operating time for the same station in CQP 2019. S/O and S/O-Assisted entries are combined into one overall list, regardless of power level, QTH or final score.

Congratulations to the Top 10 finishers shown on the next page!

Plaque winners shown in green.

Fun contest

AA4NC

Great to get a couple hours in the CQP. Got a lot of "Hi Will" from the 1x1 calls, but I had no idea who any of them were :>)

Good contest as always in spite of poor condition. Brief 15m opening did help.

It was exciting to contact people in California from Maryland. My first time. I enjoyed the professionalism and friendly remarks. Thank you for continuing it this year. I plan on participating again next year. 73

AB6ET

Conejo Valley ARC not on the list but it has been in the past.

AC4G

Most of my effort was search and pounce, but lots of activity due to the number of CA stations operating. Was able to work a few CA on 15m CW/SSB for a short opening Sunday afternoon as I checked the bands many times to find any openings on 10m/15m. Wish I had stayed awake operating later Saturday night to get a few more 80m QSOs in the log. Did not hear any 160m CA stations in the time I was awake Saturday night. Nothing on 160m Sunday morning. I ran LOW power category and sometimes had to call many times since I was not able to overcome the high power gurus. Lacked 5 stations from having a clean county sweep. I am hoping to make more of an effort in coming years. Thanks CA folks for hosting this party and all of the QSOs - this was fun, but might have been better if propagation had been there on high bands.

AC6YY

I submit "check Log" only.

AC6ZM

Great participation from California stations. Missed the clean sweep but I was not disappointed with my result.

AC8JF

Plenty of weak-ish signals found, but not a great day for 100 watts and a wire.

AD3F

I spent an hour and a half in the contest over two days on a single band. The adrenaline was pumping and I enjoyed the time. I stopped on the first day when the grand kids came for a visit in the afternoon.

AF6TF

McClure Point Campground, Used EFHW-8010 and HexBeam antennas with KX3, PX3, HLA-300+ & AT-600ProII as station. It was hot and very smoky even in my tent. I hope my efforts gave many a clean sweep of the counties.

AF8A

Band condx were not very good. Most CA stations were S2 to S7 here in NE Ohio, no matter what the band. Thank goodness for sharp, sensitive receivers, DSP and ops with good ears!

AI6IN

Panic set in when the magic smoke got out. Got the new PS just in time! Missed last year; almost missed this year when magic smoke left PS. Had a blast. Thanks!

California QSO party belongs to the "big parties". That's why I expected to make at least 100 QSOs or more. The party started with a huge number of Californian stations on 20m CW. But after about an hour or so the band closed. How bad must propagation be that 1/3 of the stations called answered my call with continuous CQ? Or is it the increasing man-made noise in the cities? 40m was hopeless to break through the calling US stations even a good number of W6??s could be heard. The "Golden ears" award goes to K6S and K6Q for hearing my weak signal through the US curtain. Soon after I gave up for the

night. Worked a few stations on Sunday between 14 and 16z but when the signals disappeared again it was the end of the QSO party for me.

DL4JLM

Bad conditions in sun spot minimum. Hope it will be better next year.

Had many great clients in the state over the years and visited many times. So, just a minor effort, but wanted CA ops to know that we are praying for them during this fire season. Stay safe!

K2KR

Another fun CA QSO party I hope to do better next year.

K2SX

Once again I repeat my plea to make it possible to enter by mode as well as power levels, e.g. CW only, SSB only. There are a lot of CW only entries and we lose out because there is no mode entry. Also, no problem working the SEQUOIA letters but what do I do with the left-over ones, e.g. "F", "G", "M", etc.? TNX for holding the contest even under distress situation. Nice to have 15M open on Sun but still no 10M. Maybe next year will be better.

K4RUM

K4SBZ

Nearly as much activity at times as a major contest. Many pileups. However, propagation between Florida and California was poor and most stations were weak.

K4SO

Thanks to the organizers. Many big signals and great ops.

K4VBM

The bands were quite noisy - really bad at times, and the QSB was also bad making phone QSOs difficult at best. But there were some good times that helped. I actually got one less multiplier than last year - I heard some mults on 20m SSB but they couldn't hear me. Made quite a few more QSOs this year in spite of the band condx. Heard HI and AK working. CW was the money mode due to conditions, but I did make a decent number of Phone contacts on 20m. I managed to spell 'SEQUOIA' and snagged quite a few of the 1x1 stations. Checked 15m and 10m a few times, but totally dead bands. Heard many familiar calls working the CA stations. My best score ever for this one. Great fun as always!

K5HEM

Great contest - lots of action on 20m from TX but 40M was disappointing - had good luck breaking the pile-ups, but typical weak ears at this end.

This was another collaborative effort amongst the OP's who normally sign as NX6T from the Fallbrook QTH 900' ASL. Except for the usual onsite appearance of K4RB on Sunday morning, the entire operation was run remotely by remote operators. Radio: K3S into Expert-2K amplifier into a C-31 yagi for the high bands, Shorty-40 and Inverted Vees for 80 & 160. A number of writeups were done about this event

This was another WQ6X Dual-operation from W7AYT's QTH as K6C, as well as part-time (4 hours) from K6A remotely (@NX6T) from Fallbrook. Before CQP I did a revamp of the vertical system @W7AYT. Adding counterpoise wires (radials) made a HUGE difference. Upper band conditions pretty much SUCKED but I gave it a try anyway. For this contest I turned on the Contest Online score reporting to give others a chance to track how K6C was doing. Read more about this GiG

Well after deleting a contact and then deleting part of a call I finally figured out a system to us since I am not great at typing. Remote operation. In this time of no DXpeditions it is refreshing to beat the sharp end of a pileup. Many thanks to the ops who let me know of my QSK problems at the starting bell. First time in the CQP for me and had a great time. 80 and 160 were nice and quiet, in fact I had my best rate on 80. 15 was poor, 10 a no-show here. IC-7300, AH-4, 100 feet of wire. Thanks for the Q's! 73, Paul K6PO

K6PUD

Band conditions were very difficult, big props to all stations that pulled our peanut-whistle signal out of the noise.

K6RB

First opportunity to test out new antenna system. It worked.

K6RM

Fun as usual but QRP with my attic antennas was more challenging than I anticipated. Only gripe is hearing (usually CA) stations asked for a repeat MANY (4+) times and failing to slow down their responding cw speed. Thanks for the Q's, I KNOW you had to earn them with my peanut-whistle sig!

K6RO

My first CQP since 2000. Is there a comeback award :) Thanks for putting on this great contest, Larry K6RO

K6VO

I was planning to operate CQP locally at my remote station in the California high desert, but ended up driving home before the contest as I was feeling poorly. Worked the whole thing remotely with many breaks. I managed to do better than my single op tries in the previous 2 years, I expect because conditions were good and activity was high. Tried operating a little SSB, but its too hard to run stations with my particular setup on SSB. Had several great CW runs. No one from North Dakota or NT, so I missed 2 multipliers. I hear I have a chirp on 80m, thats new. Using a K3, will have to look into it. Great contest, lots of activity, with some big QSO counts from stations outside of California too. K7GA

Just for fun - mostly CW on 80/40 trap vee

K7JA/6

First time I've actually made some effort in this one--lots of activity, but 20 Phone definitely is no place for low power! Missed VY1CO early, it seems. Enjoyed my first outing in CQP after all these years of living here. Put up sloping wires for 40 and 80 the day before the contest, and they worked well enough to give my tribander a break at night. I even worked a few dozen Qs on 160 using the 80-meter wire! Too bad I missed VY1CO when he was on early, but other mults came through OK.

K7NG

Tried harder but scored lower this year. I'll blame it on conditions...

K7NWR

Always a challenge and always fun. Having been born and raised in California, it's a type of homecoming.

K7OJL

First timer. Could only work one band because 20m skipped over me! Enjoyed the contest ... very few CW operators calling CQ at less than 30+ wpm. Could only work 40m as 20m skipped right over me.

?It was the best of times, it was the worst of times?? It was the California QSO Party, 2020 version. Hoping for lots and lots of contacts, I was surprised how dupes quickly filled the bandmap! I was expecting to find a lot more activity than I did. On Saturday morning, there were too few stations to work on 40m and the same on 20m. NM is in between the two skip zones as noted by KA6BIM in OR on Sunday as he lamented similarly. When 20m opened up from NM to CA, the bandmap got a lot livelier! The same was true as the afternoon wore on and then 80m opened up. Still, after a 30-minute sweep through any band, it was slim pickings. I thought much of CA was stuck at home. I hope it gets better for you guys and the rest of us! For this event, fewer non-CA ops answered my ?CQ CA? calls than similar calls in previous parties this year. Three ops answered my last-minute attempt to work AA6W, my last contact. I sent his call four times and others still kept calling. Then he faded away and the others left. Patiently, Don returned and we squeezed out the contact. Unfortunately, I could have worked the other callers if they had only listened! For the CA ops, please learn and use your four-letter county abbreviations on SSB! I didn?t operate the entire contest as I got bored with no new stations to work and no responses to my CQ?s. It was fun (the best of times) while it lasted. Getting SEQUOIA was easy and the many 1x1?s were abundant and, like Chicken Man, everywhere. Now, if only you could get the rest of the CA HF ops to participate? 73, Bill, K8TE, K3/KPA1500, low dipoles CQP 2020?

Can we move CA a little farther away? It is just too darned close for 10-20 mtrs. The worst band conditions in years to the west coast! Ugh!!! Some of the worst band conditions out to the west coast in years! Ugly, but still fun!

Fun QSO Party, as usual. Always interesting to see geographic-propagation differences exhibitd by CA stations. At least, that's what I THINK I'm seeing. :-) CU next year.

N6DE converted ADIF.

KG6BXW

Had a lot of fun this was my first serious HF contest. The only other contests I've seriously done are the VHF contests as a rover station. I would have applied for the New Contester award but I fell short of the required 100 contacts. My station is a Yaesu FT-891 and a 132ft EFHW at about 50 feet.

KG6LWE

Think I have it right this time. QSO #48 is empty because I missed that one when manually incrementing serial numbers.

KG6NRV

N6DE created from ADIF provided. Note he mostly sent #1 with his early QSOs and then starting sending the real QSO number later when he moved to 80m.

Ah, the CQP. Ah, the CQP. Conditions seemed abysmal, but I had fun.

KK6L

I played around for about 12 hours, with a few breaks in between. It was a good test of the new station at my parents' house, but not quite up to snuff. The shack computer interface also crashed a couple times, and I had a sticky Rigblaster relay that kept acting up. Overall, an okay time. KB!  
had a great time. Thanks to all who helped organize this.

KM4HI

Enjoyed the contest and FB participation from CA ops.

KM4QE

Noisy band and QSB but I enjoyed it anyway.

Seems like fewer stations on. Did the fires cause that?

I believe the error code is correct, as I seem to remember noting the time as I entered it from my written log.

I competed in this contest once back in the 90's but never submitted a log that I can recall. I was absent from the hobby for about 20 years until a few months ago when I purchased a 2nd hand TS-940, put up a 40M horizontal Delta Loop at about 15 feet and a G5RV at about the same height in preparation for the CQP. I missed making the 100 QSO requirement for the "New Contester" award but that's ok. I had the best time I've had in years! Not bad for an old man with low antennas, low power, and over 20 years away from the hobby. Many thanks to all the OP's that make this event happen! Looking forward to next year!

A last minute physical distancing QRP portable county expedition. KX3 @5 watts, 59' wire between two 20' fishing poles, 80' wire between 30' and 20' poles. Pen and paper logging. Except for CQmessage all CW was hand sent with the bolt-on KXPD3 paddle.My thanks to Kurt, W6PH, for the use of his Inyo county cabingrounds for my station. I had a wonderful view of Mt. Whitney andsurrounding range from

my patio table operating position. Mults never heard were KY, IA, ND, MR, AB, NT. I did copy a VE2 answering somebody's CQ, a VA7 was in a rag chew and W1XX was CQing on 20 SSB Sunday afternoon but couldn't hear me. Working the single letter CA stations for the SEQUOIA award was accomplished on 80. 40 was too long Saturday night and I was inaudible to CA stations on 20 and 15. QSO #44 with K9NW may not be complete. It was not clear he copied my exchange. QSO #186 was first sent to K3UA (80 meters!) and I copied his exchange. But the timing seemed off and I thought he might be working someone else despite my frequency being clear. So I gave #186 to the next station that called, N6MA. Not the best spur of the moment decision in hind sight. Phil did hear me! I was thinking my 5 watts and low wire couldn't be making it to PA on 80! Though I spent a long time transcribing an accurate log there may still be errors. Apologies to anyone who loses points for any of my errors. Thanks to the CQP organizers for another great QSO party! My thanks to Kurt, W6PH, for the use of his Inyo county cabin grounds for my last minute Covid-19 physical distancing county expedition. Operating with Mt. Whitney in view was a wonderful bonus! The station was a KX3 @5 watts powered by a 27T AGM battery which used to live in a TV ENG truck. 80' of wire was stretched between a 30' Spiderbeam pole and a 20' fishing pole for 80 meters. For 40, 20 and 15 meters a 59' wire was supported by two 20' fishing poles. Both antennas were end fed via a double banana to BNC connector and tuned with the KX3 tuner. I set up on an outdoor table with a beach umbrella for shade. It was in the 90s and windy both days, low 60s Saturday night. I never heard KY, IA, ND, MR, AB, NT. A VE2 answered somebody's CQ, a VA7 was in a rag chew and W1XX was CQing on 20 SSB Sunday afternoon, but couldn't hear me. Working the single letter CA stations for the SEQUOIA award was accomplished on 80. 40 was too long Saturday night and I was inaudible to CA stations on 20 and 15. It was fun to activate Inyo county on CW. Except for CQs all sending was done with the bolt-on KXPD3 paddle. Logging was with pen and paper, transcription pending. Thanks to the NCCC organizers for pulling off the CQP in this most unusual of years, and thanks for the QSOs. 73, David N6AN

N6DVS

The times are approximate. I remember the time range only.

N6FD

Had antenna problems until Sunday morning; was then able to get on in the contest.

N6GHZ

Had a hard time fitting in among all the "big guns" since I was just using wire dipoles (and probably not in the best orientation). Resorted to S&P operation. 80 and 40 were very noisy. 15 not open. 20 was the good one. But I had a real good time except for getting up at 3 AM Sunday to only make 3 contacts from then until 7:30 AM. I'll know better next time. A BIG thanks to the organizers...

N6YEU

There will be two qsos logged by other stations who will show N6YEU in their log but not mine. Both were in MT and got my exchange but due to operator error on my part both were accidentally deleted. I tried to make a note on the qso numbers but seem to have misplaced it. I hope they get credit.

My N3FJP software for this event is indicating 8.5 hours of Op time, which I agree with. I don't know why the cabrillo log checking "Robot" is not liking that bit of data, so will let you folks figure it out, if relevant. I did notice, (and I removed) the period that was appearing directly following the WY in the LOCATION: header line. Please note that I worked the following stations for "SEQUOIA": K6S, W6S, N6S, K6E, W6E, K6Q, N6Q, W6U, K6U, K6O, N6O, N6I, W6I, N6A, K6A, and W6A. 73, N7MZW

Found Alpine and Butte this year. Still four counties missing, tho I heard at least two of them. Where does everyone go after midnite on Saturday?

N7VS

Thank you for hosting an interesting. Having lived in California for many years I have always enjoyed this one. Perhaps someday I can do another expedition. I especially enjoyed looking for "Sequoia" stations during the contest. Conditions on 20 meters were not good. Made only one contact on that band and none on 15 or 10. I hope to be back next year. Hopefully band conditions will be better. 73, Steve Brandt N7VS

Pretty good conditions on 20, 40 and 80. 15 opened about an hour a day here. It went from no signals to good signals in a couple of minutes and then stayed open for about an hour and went to no signals. Same on Sunday. Thanks to the mobiles for the mults.

N8II

Best condx I can remember on 40 and 80. 15 was wide open 1640-1845Z Sunday. 20 was a bit rough, signals dropped early Saturday, opened slowly Sunday. My last new mult was before 20M closed Saturday, no new mults on low bands or Sunday.

NC3Y

This is my favorite contest before the Sweepstakes to make sure all the bugs are worked out of my station! If I can get right through to California then I know all is well.

NC6K

Well, this beat my previous record by 25%, but it's not even likely to get me a bottle of wine this year. The competition has become brutal here, so personal records are about all I can hope for with one SteppIR and wire antennas for everything else, including the 2nd SO2R radio. Conditions were fantastic on the open bands - low noise, fairly steady signals and plenty of room even on SSB. 15 M wasn't open much, but there were some short periods where the East Coast was in and loud. I could not find ND and NT unassisted, so settled for 56 mults, but I can't complain. I must have worked every New England state at least five times, which again is a record for me. Even DE was easy to get multiple times. Thanks to all for the Qs and see you again next year! 73de NC6K

NC6V

Fun contest again, thank you to everyone that contacted me. I can't wait until next year's contest.

ND0C

Good activity but didn't hear 11 counties in the 7 hours I was on. Was fun to get back into the CQP - I've missed several of the last few years due to family activities/events. Good activity but I was really hurting on counties - just heard (and worked) 47 counties.

NE6DX

Band conditions were poor, but worked all stations called. CQWIN ver. 12.7 insisted it was 2000, edited by hand to 2020.

NF8M

Note to log checker: I inadvertently sent serial number 23 twice. I worked W6S, then checked them off my checklist and tuned the rig without logging the QSO (N1MM cleared the QSO data), then went on and worked W6I and gave him the same number.

NG7Z

Just worked 40 and 80. Nothing heard on 20 or above. Too close. Thanks for organizing this popular contest.

NK4O

Lots more stations than expected, and didn't have time.... Next time I'll add to the calendar and try to work all CA counties! -Tnx

Been off the air since 1997 and just now getting back into the hobby and my first contest in many years. Thanks for the assist with the fill in list for the contacts as I don't have any logging software as yet. Will do it again next year and hope to do better. Don't think I will win any awards but I did try to get as many as I could! Thanks much. 73's John / NL7WA...Retired U.S. Coast Guard...Communications Officer...need to catch up....

Had fun see you next year!

NM6G

First time back on the air in at least 5 years and maybe 10 for a contest. Fun time despite the humbling experience of 100 watts and a T2FD dipole at 25' even if it IS a fairly rare county. But, I worked out the bugs for using the Icom RS-BA1/RC-28 along with WriteLog remote in preparation for getting the station operational. SSB would be a LOT easier if everybody would give the four letter multiplier for their county. The big surprise is more CW than SSB when my declaration was SSB! S&P worked for me. I gave up around midnight (7:00 UTC) and woke some thing woke me up about 4 hours later. Turned out Murphy bit with a power failure at 10:20 UTC that lasted 8+ hours. The operating position in the house is on a UPS and then automatic whole house generator moments later, but the station is manual transfer. The remote Icom and WriteLog servers were not happy with a dirty disconnect and instead of my waking up and sitting back in the saddle for an easy ride with a cup of coffee, it was off to busting broncos! But it was a good shakedown. Sorry for the paltry Q total.

NN4K

The California Qso Party is always fun with many participants. Great CW operators. Thanks for the contacts.

NO2C

Great Contest

NP2X

Surprised more SSB stations did not use phonetics for county abbreviations. I had to ask for clarification on about 20% of the SSB stations I worked. If I was running in CQP from CA, I would this consider this an impediment as it slows down the QSO rate. In many instances, the number of syllables in the county phonetics is almost as long as saying the county name itself. Maybe they are doing this to try and attract more attention from the CQP county sweep hunters. - NP2X

257th line is from W4FLL who was out of state. He sent me an email last night that he didn't know it was for CA only; even though I was CQing for CA only. Of course he is from Nevada. So, I unknowingly logged it thinking he was in Nevada county. I tried putting the X at the beginning of his Cabrillo line, but your log portal didn't like that. I would've removed it, but wasn't sure if allowed. Plus you'd see a skip in s/n. :) ~ Val

From the beginning of the QP the band was full of W6 stations with some weak and some really nice signals. It was so hard job to break the USA pileup especially on SSB and many times when nobody called the W6's they're don't heard me. I lost so many time with calling and missed so many stations who I heard. At 19:22Z closed the band to the West Coast but at 20:45 opened again and I made 2 QSO. I heard and called another multipliers: ALPI, DELN, KING, LASS, PLUM, SISK, VENT but no luck ... K6G I called so many and long time on SSB but he don't heard me. W6CQP I called maybe 2-3 hours totally, but no luck even when any other station don't called him. Usually in all QP I heard in the pileups John N6MU, but this time he missed from my LOG :( K6AQL/M was not strong but usually when USA wall dropped down back to me to my 1st call - FB ears. Not easy with such propagation, good signals but many very very weak.

VE3DQN

Tough slugging this time out in eastern Ontario. The worst conditions of the past half dozen CQP's I've entered. Need only Butte county to complete all counties, but never heard a peep from Butte.

VE3EL

Please note-Due to my Computer Virus 'messaging' up the beginning of the Contest...The 'FIRST' EIGHT contacts are NOT in the correct time. They were made on Saturday between....16:43 and 20:27 and then things went Kaflooy!! :) :) After SEVERAL Hours of a Professional helper, The old Virus protector was made and n updated one installed! Always a fabulous event. Lots of easy mults and the rare ones that make it a "Where's Waldo" search. This was my last CQP from Connecticut. Not my personal best this year, but pretty close with 10 hrs on BIC "Butt In Chair". Next CQP will be from our new home in North Carolina. I might give up the big DX contests in the future, but I'll never will stop operating CQP.

I love this event. Reminds me of my mobile effort in the CQP back in the 1990s (I was K8HVT then). I didn't realize that there was no CW or SSB category or single band categories. I realize it's more work, but it sure makes the contest more fun for the out-of-state ops.

Did not expect much from the current setup. My vertical in the backyard never performed well.

Nevertheless, I managed to even have a QSO with Connecticut. 1st time ever! So, I am vastly satisfied with my score!

We operated multi multi low power from NEVA with two stations and four operators part time using solar power, batteries and one small generator from an elevation of 5000 feet in the Tahoe National Forest using

restored four element KLM beams for 40M and 20M and an inverted Vee wireantenna supported by tall pine trees for 80M. Our Nevada County CQP location is more than 2 miles from any paved roads and there is no commercial/public electric power or water for many miles from our location. Lots of fun and we all enjoyed providing CQP contacts from NEVA .

Mono County Expedition W6ML (W6KC Operator) Fortunately, the smoke from the California fires let up on the Wednesday before CQP so I could launch my wire antennas in the mostly clear blue skies in Mammoth Lakes, Mono County. This year again I used dipoles for 40, 20 and 15 plus an inverted V for 80. They were all squeezed in at about 60ft between my two favorite pine trees. In spite of a couple of Murphy visits (RFI in my logging PC and tripping the master circuit breaker causing a power outage during a nice CQP run) I achieved one of my goals in making 1,000 CW QSOs. I have never made 1,000 CW QSOs in any contest so it was good to finally tick off a new milestone. The good participation helped offset missing 10M and most of 15M during the weekend. I missed NT and ND for the sweep, but was happy to achieve good results with a full-time effort minus about two hours for Murphy. And many thanks to the NCCC for sponsoring another great CQP! And also thanks to Hank, W6SX (we are about one-half mile apart in Mammoth) for helping me with my antenna planning and sharing the bands during CQP. K3s, KAT500, AL80B, wire antennas

W6NKR

Good fun! Finally broke 100 QSOs.

W6O

Expedition to IMPERIAL County, CA. It was appropriate for a bunch of Arizona Outlaws to be assigned the call W6O as part of the SEQUOIA event in the 2020 California QSO Party. We were W6Outlaws! We had a crew of good operators and experienced some huge pileups and great QSO Rates for most of the contest except between 0600Z to 1200Z when the East Coasters were sleeping. We operated out of an apartment in Felicity, California which several Geographical Societies have proclaimed to be the Official Center of the World. I would like to thank our hosts Jacques-Andres and Felicia Istel for their great hospitality. If you want a good read, look up Jacques-Andres Istel on Wikipedia. It is truly an amazing story. We had a great time! K3 / KPA1500A3S with 40 meter add-on dipole 80 meter inverted VAB-577 (Rocket Launcher) 50 foot Military Surplus Mast

Putting together a MM County Operation in 2020 was as rewarding as it was challenging. Now if we could have found those darn Canada mults! Planning a MM County Operation in 2020 was as rewarding as it was challenging. Overall it was 200% fun. If only we could have worked those missing Canadian mults! Thank you NCCC for the honor of hosting W6Q

W6SC

Biggest effort that I've put into CQP. Lots of fun sorting out signal reports, leading zeroes, cut leading zeroes, and other "noise". I hoped nobody would give me their number as 599 but sure enough, somebody did. I had to scramble to get it in there before he started repeating everything. A good time!

W6SFI

W6T

This was my first experience in CQP as an Expedition station. It was a lot of fun. It gave me a newfound appreciation for those who do annual Expeditions to the rare counties. Many thanks to Dean N6DE, Glen W6GJB, and Ken K6MR for their recommendations and for their encouragement.

W6TCP

Exceeded my expectations by a huge margin! Managed a sweep for the first time! Thank you to all the KB'ers for the points! And to the CQP team for another great party! Thanks to Denny KX7M, Oliver W6NV (who was also kind enough to let me loose at his station)!

W6TK

I tried to eliminate confusion between W6 "TK" and W/K/N6 "Q" by inserting extra spacing between "T" and "K" in my call. But then people thought my call was W6T. Anyway - I had about 100 dupes as guys kept calling me back to try to make sure to get the "Q" in their logs. I hope this doesn't screw other guys logs. My effort to help may have not worked so well? Thanks for all you guys and your efforts in CQP! 73 - Dick - W6TKPS - I was able to get the SteppIR working again, but looked like Bill, K6ZFO, had good time with W6L.

W6XB

Great activity! Quite different than contesting from WA. Even with an indoor inv. vee in the attic, the EU's were sometimes overwhelming.

N6DE received ADIF from WB6RLC with no serial numbers. N6DE filled in dummy TX and RX serial numbers. Designate this log as checklog. It's clear from reverse logs that WB6RLC made up fake serial numbers off the top of his head when making QSOs. So stations should not be penalized for serial number mismatch with WB6RLC. County, callsign, mode and frequency should be OK. N6DE 10/27 comments: resubmitted with 9999 as TX and RX serial number.

WB9TFH

Only on part time, wished I had more time for a better score, not much better than the last time 2018 :( Anyway got some cw Q's, using CW Get to help. Mostly 20m daytime, only 2 on 40m and none on 80m. No prop here from the west, 40m & 80m mostly dead in evening.

Thanks to all that help put this together! See you next year!!

WD0T

Fantastic turnout as always with CQP in state stations, makes it super fun.

WD6T

Another "both sides now" contesting experience as I op'ed from both the N6O@N6RO M/M (remote...80/75m) and from my modest home station. Wasn't sure how much/if I was going to operate from home, but it's been over 10 years since I did CQP from home and I was curious how it would play. So I arbitrarily committed to 250-499 CW and 100-249 phone QSOs on the web registration... and that motivated me to keep going (especially on phone). I was also motivated by trying to break the record for ALAM SOHP(A), which I think I accomplished. As my N6O shift was 0000-0800, my home effort has limited 40 and no 80/160. From home, some good runs/moments (even on phone)...and some slow slog times: 20m was mediocre with deep QSB, and more than a couple "SRI NIL TRY LATER" QSOs. 40m was better. 15m had a brief life here near noon on Sunday. Lots of SO2V using IC-7610 w/PW-1, low roof-mounted KT34A, ground-mounted HF2V. Had usual home RFI problems, but family (mostly) tolerated the bathroom fan, washing machine, and computers going nuts. Missed only ND and NT. As for N6O, lots of fun doing dual mode SO2R on Flex 6600M. Remote worked flawlessly. Nice to work so many friends, near and far. My callsign recognition is slowly improving. Thanks to the CQP organizers for doing a great job on this contest.
